

SANSEC AI — Malware Analysis Report

Sample Overview

Filename	wannacry_variant_sim.exe
File Type	PE Executable (Corrupted or Invalid)
Size	121 bytes
Shannon Entropy	4.99
Risk Score	30/100
Threat Level	Medium
SHA-256	b8e1e44c87cfc755a28158ed75b0aea89d4a840c1473089d03a0bac1c4c766b8
MD5	ca0f3c5db4f2cd73b9b4798bfd3ec47
SHA-1	a7e572495c77984663e457058f283acfbbc3d3b6
Scan Timestamp	2026-07-02T11:35:34.182671+00:00

Heuristic Signatures

Severity	Name	Description
Medium	Embedded IP Addresses	Found embedded IPv4 addresses: 192.168.22.40.
Medium	Embedded URL Indicators	Found references to external network endpoints: http://c2-controlled.botnet.net/beacon.

Indicators of Compromise (IOCs)

IP Addresses

- 192.168.22.40

URLs

- http://c2-controlled.botnet.net/beacon

Domains

- 192.168.22.40
- c2-controlled.botnet.net

Emails

None detected.

MITRE ATT&CK Mappings

ID	Technique	Tactic
----	-----------	--------

T1071	Application Layer Protocol	Command and Control
T1041	Exfiltration Over C2 Channel	Exfiltration

AI Threat Assessment

SANSEC AI Executive Assessment Summary

The sample **wannacry_variant_sim.exe** has a **Medium** threat profile with a calculated risk score of **30/100**.
Low immediate concern: no critical static heuristics were triggered, but this is not a clean verdict.

Key Technical Findings

- File type: PE Executable (Corrupted or Invalid)
- Entropy: 4.99
- SHA-256: b8e1e44c87cfc755a28158ed75b0aea89d4a840c1473089d03a0bac1c4c766b8
- No valid PE import/section table was parsed.

Heuristic Signatures

- Medium: Embedded IP Addresses - Found embedded IPv4 addresses: 192.168.22.40.
- Medium: Embedded URL Indicators - Found references to external network endpoints: http://c2-controlled.botnet.net/beacon.

Indicators of Compromise

- IP Address: `192.168.22.40`
- URL: `http://c2-controlled.botnet.net/beacon`
- Domain: `192.168.22.40`
- Domain: `c2-controlled.botnet.net`

MITRE ATT&CK Mapping

- T1071: Application Layer Protocol (Command and Control)
- T1041: Exfiltration Over C2 Channel (Exfiltration)

Recommended Response

1. Preserve the report for audit/history.
2. Escalate to deeper analysis only if the source, user report, or telemetry is suspicious.
